

template: Benchmarks

Ivan Jacob Agaloos Pesigan

1 foo

```
#> Error in match.arg(unit, values): 'arg' should be one of "nanoseconds", "ns", "microseconds",  
"us", "milliseconds", "ms", "seconds", "s", "secs", "time", "t", "frequency", "f",  
"hz", "khz", "mhz", "eps"
```

2 All Tests Under tests-benchmark

```
#> Error in match.arg(unit, values): 'arg' should be one of "nanoseconds", "ns", "microseconds",  
"us", "milliseconds", "ms", "seconds", "s", "secs", "time", "t", "frequency", "f",  
"hz", "khz", "mhz", "eps"
```

Environment

```
ls()

#> [1] "i"          "root"       "tex_file"
```

Class

```
obj_i <- lapply(
  X = ls(),
  FUN = function(x) eval(parse(text = x))
)
unique(
  lapply(
    X = obj_i,
    FUN = class
  )
)

#> [[1]]
#> [1] "character"
#>
#> [[2]]
#> [1] "root_criterion"
```
