

# template: Internal Tests

Ivan Jacob Agaloos Pesigan

## Tests

```
source(  
  root$find_file(  
    "latex",  
    "r-scripts",  
    "tests.R"  
  )  
)  
  
#> test-template-foo  
#> Test passed
```

## Environment

```
ls()  
#> [1] "i"      "root"   "tex_file"
```

## Class

```
unique(  
  lapply(  
    X = ls(),  
    FUN = function(x) {  
      class(  
        eval(  
          parse(  
            text = x  
          )  
        )  
      )  
    }  
  )  
)
```

```
)  
    )  
    }  
  )  
)  
  
#> [[1]]  
#> [1] "character"  
#>  
#> [[2]]  
#> [1] "root_criterion"
```

```

lapply(
  X = ls(),
  FUN = function(x) {
    paste(
      class(
        x = eval(
          parse(
            text = x
          )
        )
      ),
      x
    )
  }
)

#> [[1]]
#> [1] "character i"
#>
#> [[2]]
#> [1] "root_criterion root"
#>
#> [[3]]
#> [1] "character tex_file"

```
