template: External Tests

Ivan Jacob Agaloos Pesigan

Tests

```r
source(
    root$find_file(
        "latex",
        "r-scripts",
        "tests-external.R"
    )
)

#> test-external-template-foo

#> Test passed
```

Environment

```r
ls()

#> [1] "i"        "root"      "tex_file"
```

Class

```r
unique(
    lapply(
        X = ls(),
        FUN = function(x) {
            class(
                eval(
                    parse(
                        text = x
                    )
```

```
                    )
                )
            }
        )
)

#> [[1]]
#> [1] "character"
#>
#> [[2]]
#> [1] "root_criterion"
```

```r
lapply(
    X = ls(),
    FUN = function(x) {
        paste(
            class(
                x = eval(
                    parse(
                        text = x
                    )
                )
            ),
            x
        )
    }
)
#> [[1]]
#> [1] "character i"
#>
#> [[2]]
#> [1] "root_criterion root"
#>
#> [[3]]
#> [1] "character tex_file"
```
