template: Benchmarks

Ivan Jacob Agaloos Pesigan

1 foo

```
#> Error in match.arg(unit, values):  'arg' should be one of "nanoseconds", "ns", "microseconds",
"us", "milliseconds", "ms", "seconds", "s", "secs", "time", "t", "frequency", "f",
"hz", "khz", "mhz", "eps"
```

2 All Tests Under tests-benchmark

```
#> Error in match.arg(unit, values):  'arg' should be one of "nanoseconds", "ns", "microseconds",
"us", "milliseconds", "ms", "seconds", "s", "secs", "time", "t", "frequency", "f",
"hz", "khz", "mhz", "eps"
```

Environment

```
ls()

#> [1] "i"         "root"       "tex_file"
```

Class

```
obj_i <- lapply(
    X = ls(),
    FUN = function(x) {
        eval(
            parse(
                text = x
            )
        )
    }
)
unique(
    lapply(
        X = obj_i,
        FUN = class
    )
)

#> [[1]]
#> [1] "character"
#>
#> [[2]]
#> [1] "root_criterion"
```
